I will check on them Thursday and have you addresses by COB. Down in town we only got a few inches but a heck of a lot of moisture. Wet and super sloppy. I'm sure up high on north facing chilly slopes, quite a bit more accumulation had to have happened.

Talk soon.

Lisa - Can you check with the Assessor's office on the ownership for both the A-31 site as well as A-45 site that Dan was assuming belongs to Steve Fearn? That will help us to track down the right owner for access. Thanks.

Did Silverton get a lot of snow yesterday?

Hi

To avoid any potential contribution from contamination in Eureka Gulch or the old mill, we have decided to move our "upstream of Eureka" location (A33) further upstream. There is an ARSG location (A31) that is described as upstream of Niagara Gulch with coordinates listed as

37.8864 107.5617

This plots up across the river from the structures above Eureka.

Other than this change, the list is the same as I sent earlier and is considered final. EPA is

working on access.

Dan
